|--------|--------------|----------------------|--------------------|
| • HTML | • Python | • Project management | • Leadership |
| • CSS | • MongoDB | • Problem solving | • Multitasking |
| • Java | • JavaScript | • Teamwork | • Active listening |

PROJECTS

Portfolio Web 1:-

A simple and clean personal portfolio website built using HTML and CSS to showcase projects, skills, basic contact information, etc. This project reflects foundational web design skills and static website structure using semantic HTML and responsive styling with CSS.

Tech Used: HTML, CSS

Portfolio Web 2:-

An advanced portfolio website created using HTML, CSS, React.js, Tailwind CSS, and JavaScript. It includes interactive components like dynamic project, contact information, skills, smooth scroll, etc. Designed to be fully responsive and modern with reusable components and Tailwind utility classes.

Tech Used: HTML, CSS, React.js, Tailwind CSS, JavaScript

Farmers Market:-

An e-commerce platform where farmers can create their shops and directly sell their products at their own prices. This removes the need for mediators, allowing farmers to gain more profit and customers to receive fresh farm products. The platform handles user registration, product listing, cart functionality, and order management.

Tech Used: React.js, Node.js, MongoDB, Tailwind CSS, HTML, JavaScript
